

We CAN save Darfur!

Contributed by Hubert

Over the last few months I started doing anything I could to stop the Genocide in Darfur. I joined myspace groups, I made 2 slideshows about the slaughter there and over the next few days I'll be doing extra-credit presentations about Darfur at my school. Yesterday, my myspace group reached one of the biggest projects we did. We got 2004 people to sign a petition which was sent out to the president last night.

The videos I made received very positive feedback from people who watched it and a lot of people put it on their myspace pages, and in their myspace bulletins. If we really try to help Darfur, we can and we will!

Some of the stuff I did to try to help Darfur.
